Professional Profile

I am a seasoned digital professional with extensive experience producing documents and publications, managing structured information, creating digital and printed material, and developing systems for organizing data.

I am accustomed to working independently, taking projects from raw information through to polished final output.

Key Skills

- Document & publication production
- Typesetting & page layout
- Digital & print graphics
- Print preparation & booklet production
- Data organization & records management
- Database design & information management
- Image editing & graphic composition
- Independent working & project delivery

Work Experience

Independent Software Developer | 2002–Present

- Design, develop and release native macOS and iOS applications independently.
- Work across the full development lifecycle, from architecture and interface design through testing, release and ongoing support.
- Develop custom graphics, rendering and text technologies using Objective-C, Swift and Metal.
- Maintain and support released applications, investigating customer-reported issues and delivering updates.

Independent Publisher & Desktop Publisher | 1997–Present

- Write, typeset and produce books and booklets, including cover design, illustration, page layout, print preparation, printing, collation and binding.
- Produce promotional graphics and small-format advertising material for software projects.
- Create TrueType fonts from scanned and traced handwriting.

Data & Information Management | 1997–Present

- Create and maintain databases and catalogues for long-running projects, including collections containing thousands of film and music titles.
- Develop custom formats and tools for efficient retrieval, organisation and presentation of information.

Chief Web Architect – thePit.com | 2000–2001

- Designed the initial logo and graphics for the dot-com startup, thePit.com.
- As part of a four-person team, built the site's underlying logic and implemented the complete website using HTML, JavaScript and Active Server Pages, working to specification.

Risk Management Analyst – Sanwa International Ltd, London | 1998–2000

- Worked within the bank's risk management department to develop *Genesis*, a tool for collating and graphing risk data and presenting it directly to traders, and which was described as “a revelation” by *Futures & OTC World* in April 1999.
- Used DTP (CorelDRAW!), Excel, Word, Visual Basic and the Win32 API.

Press & Publicity Officer – University of York Multimedia Society | 1995–1996

- Produced illustrated programme booklets from supplied text, including typesetting, page layout, cover design and graphics.
- Designed 2–3 posters per week for society screenings and events.
- Managed printing, copying, binding and distribution of programme materials.

Education

University of York — BA Mathematics, First Class Honours | 1997
